EXPERIENCE

Software Engineer II — CNG Holdings, Remote

December 2022 - PRESENT

- Manage technical debt throughout 40+ code repositories
- Identify areas in the codebase that need improvement, and assign tasks to junior engineers
- Deliver on design features requested by the product owners within deadline

Full Stack Software Engineer — Eastech Flow Controls, Tulsa, OK

January 2021 - December 2022

- Developed a visual tool that is unique for the industry, and is the flagship feature shown front and center in marketing media and tradeshow
- Developed a mobile app for operators in the field to view data and assess sites on the fly
- Created a new website for the company, giving the company's primary marketing tool a sleek, modern face

Freelance Web Developer — Self-Employed, Cypress, TX

June 2019 - January 2021

- Sourced work for myself and my partner, assessed client needs, and delivered products that met or exceeded expectations
- Communicated regularly with clients and kept them in the loop using with work management tools such as Trello and GitHub Projects
- Technologies used: Flask (Python), SQL, NodeJS, React, vanilla JavaScript for UI, and WordPress

Developer in Residence — DigitalCrafts, Houston, TX

June 2020 - January 2021 (part-time)

- Assisted lead instructor in teaching students full-stack web development
- Organized office hours outside of class to help students with questions and solidify web development concepts
- Reviewed students' code and provided feedback for improvement
